- U.S. Air Force Senior Noncommissioned Officer Academy – Strategic Management and Executive Leadership
- Department of Defense Professional Deployment/Distribution and Transportation Certification

PROFESSIONAL EXPERIENCE AND JOB SKILLS

Operations and Compliance Superintendent
Albuquerque, New Mexico

August 2021 – Present

- Leads 6-member team; assesses key logistics processes by ensuring standardized, repeatable, technically compliant process execution while promoting a culture of professional excellence as the sole planning organization for 218 end-strength personnel.
- Enables direct logistics support to 108 mission partners totaling 23K internal and external customers thus providing feedback to improve inter-organizational processes and efficiencies.
- Author's guidance, processes, and procedures for deliberate plan execution, strategy, and accountability. Leads the implementation, development, and optimization of all logistics processes.
- Manages complex projects with diverse teams and develops data-driven and outcome-based initiatives to improve business decision-making and operational efficiencies.

Distribution Superintendent
Albuquerque, New Mexico

July 2019 – August 2021

- Award-winning for best-in-class transportation and logistics services
- Served as lead contact for 67 personnel, external, internal authorities, and customers as well as support of other interagency partners in all areas concerning logistics, human resources, organizational compliance, and legal assistance.
- Developed strategic plans and execution improvements of transportation and logistics systems, including the implementation of TMS, ERP, OMS integration, freight audit, and centralized solutions for customer support: billing, labeling, tracking, and manifesting.

- Oversees the acquisition of transportation providers to develop a broader network in collaboration with global procurement teams.
- Centralized logistics processes by increasing throughput and efficiency in cooperation with all operational areas.

**Logistics Deputy Director
Fort Meade, Maryland**

July 2015 – July 2019

- Brokered 89 service-level agreements between the Air Force's leading intelligence organization and 82 of its core global mission partners with a value of \$5M.
- Negotiation of all carrier contracts and service agreements. This includes account management skills, a high level of creative problem solving and discussion.
- Ensured all aspects of national and tactical level intelligence requirements were met by integrating sound coordination solutions to meet component objectives for 6.7K geographically separated employees.
- Negotiated vehicle fleet management strategy with the General Service Administration, innovated supply chain network and transportation plan with 203 vehicles for two U.S. Presidential Inaugurations.
- Aligned an interagency logistics network that provided a multi-modal transportation effort across forty-seven globally separated sub-organizations.

**Organization Training Administrator
Suffolk, England**

February 2011 – July 2015

- Administered education and training programs for 450 personnel across 9 functionally diverse planning disciplines.
- Led a six-member career field restructuring team and oversaw task inventory and qualification hierarchy. Redefined transportation operations and critical skills adaptation for 2.5K Enterprise-wide personnel.
- Streamlined inventory of Education and Training (E&T) tasks for maintenance, operations, and support training attributes; Performed education services, curriculum development, and instructor activities. Earned the Air University's Professional Manager distinction.
- Advised senior leaders and coordinated with policy managers outside the functional community to advocate for program implementation across the enterprise to secure a \$31M supply chain.

**Deployment and Distribution Supervisor
Tokyo, Japan**

March 2006 – February 2011

- Enabled qualification training programs, strategic logistics concepts, and capabilities for 112 team members across five functional areas of the discipline.
- Led enterprise transportation management systems, and distribution planning using automated data systems, measurement tools, automotive repair software, and multimedia for strategic decision-making.
- Oversaw daily vehicle dispatching operations and innovated strategic sustainment, distribution processes, and functions.
- Supervised safe transport of sensitive classified equipment; ensured operability of 125 vehicles valued over \$5.6M across 235K accident-free miles.
